

## **SUPPORTING INFORMATION GUIDELINES**

### What is Supporting Information?

Supporting Information is additional relevant appendices, figures, tables or data that is only published on the Wiley Online Library web site, and not in the online PDF or print editions of your paper.

Note: Supporting Information should not be used as a repository for miscellaneous source data or metadata that is of little relevance to your publication, or which will be of little use to readers.

### Preparation of Supporting Information is in four stages:

#### (1) Preparation of main manuscript text

Supporting Information should be cited in the main text of your article, just like other Figures and Tables are. On first mention of Supporting Information, please cite in the format of (or similar to):

“...[\(see Appendix S1 in Supporting Information\)](#)”

(where “S” denotes Supporting). Subsequent references to additional Supporting Information can simply specify the supporting Appendix/Figure/Table number, for example:

“... [\(see Appendix S2\)](#)”

#### (2) Preparation of Supporting Information section in main manuscript

The Supporting Information section is inserted after the References section in the main paper. It should be in the form of:

##### [SUPPORTING INFORMATION](#)

[Additional supporting information may be found in the online version of this article.](#)

[Appendix S1 Insert short title  
here Figure S1 Insert short  
title here Table S1 Insert short  
title here](#)

[Please note: Wiley Blackwell are not responsible for the content or functionality of any supporting information supplied by the authors. Any queries \(other than missing material\) should be directed to the corresponding author for the article.](#)

In this section, the title of the Supporting Information should be a short title that succinctly describes the content of the file. A full title with further details and definitions, if necessary, should be given in the Supporting Information file itself (see below).

#### (3) Preparation of Supporting Information files

Supporting Information can be in any file format (e.g. Word, Excel, PDF). Please do consider what the most useful file format would be—for example, long tables are generally more useful in .doc or excel than pdf formats. Please insert a full title for the material at the head of your file, labelling it, for example, Appendix S1, Figure S1, Table S1, thus:

[Appendix S1 Full title of first supporting appendix giving further details of content, if necessary.](#)

In addition Functional Ecology requests that the journal title is placed in the header of each page and the paper title with the authors' names in the footer so that once printed it can be identified as being associated with the published paper.

#### (4) Naming the Supporting Information files

Please save your Supporting Information material in separate files (not the main manuscript file).

Please name the files using the format: FEsurnameSA1.doc, FEsurnameST1.xls, FEsurnameSF3.pdf, etc., where 'surname' is the surname of corresponding author, and SA, ST and SF stand for Supplementary Appendix, Supplementary Table and Supplementary Figure, respectively.

**IMPORTANT NOTE: Supporting Information is not edited by the Publisher. Great care should therefore be taken by you in preparing the file and in following these instructions. In particular, authors should ensure: (1) all legends/captions are informative, and are labelled correctly (e.g. Appendix S1, Table S1, Figure S1), (2) the data presented are accurate, (3) text passages are grammatical and punctuated correctly, (4) the journal style is followed throughout, including lists of supplementary references. There is no opportunity to edit your supplementary files once they are published online.**

Should you have any queries regarding preparation of supporting information files please contact the Assistant Editor at [admin@functionalecology.org](mailto:admin@functionalecology.org)
